

IN BRIEF

Apollo offering internship program for area veterans

FALL RIVER — Apollo Safety, Inc., a veteran-owned, Fall River-based company specializing in safety products and services, recently announced the formation of an internship program for U.S. military veterans and active members of the reserves from all four branches of the military.

The military internship opportunity lasts 90 days, with salary based on skill level and experience. After 90 days, program graduates will receive Apollo Safety's certificate and potential employment opportunities with the company will be considered.

"For many veterans, the transition from the service to civilian life can be quite an adjustment, especially if you are unsure about what you want to do from a career standpoint," said John V. Carvalho III, a U.S. Army veteran and president of Apollo Safety, Inc. "With our internship program, we can provide an entry level opportunity for somebody looking to explore a career in the gas detection/monitoring industry with a growing company."

Apollo Safety sells and installs a wide variety of portable and stationary gas detection systems, including name brands like Honeywell, Industrial Scientific, RAE Systems, RKI, and GMI. All Apollo Safety technicians are factory-trained and certified. In addition, Apollo offers its own training program, with five levels of certification.

To apply for the military internship program, interested parties should send a resume and cover letter to John V. Carvalho III, Apollo Safety, Inc., 57 Walnut St., Fall River, MA 02780. Resumes and cover letters can also be emailed to John@apollosafety.com.
